

why Princess® is the best choice to see hawaii

Four Islands, One Cruise

1

Princess is the only big-ship cruise line offering a full season of roundtrip voyages to Hawaii from the mainland from fall through spring. There are 15-day sailings, departing from Los Angeles, San Francisco and Vancouver, B.C., that visit the four most popular islands — Oahu, Maui, Kauai and The Big Island. Skip the hassle of a transpacific flight, see four incredible islands and sail there in relaxed fashion with Princess.

The Aloha Spirit

2

On board, our Aloha Spirit program immerses guests in Hawaiian culture and cuisine through lei making, ukulele and hula lessons and traditional luaus. Special onboard performances include the Halau Hula Olana Folkloric Show. And everyone loves the revelry of the King Kamehameha Festival, one of our Festivals of the World.

Explore the Best of the Islands

3

See the best of the islands with exciting excursions, including options curated by Animal Planet™ and Discovery™. Visit the cascading Rainbow Falls on the Big Island, marvel at whales off the Maui coast. Revisit history at the hallowed Pearl Harbor memorial in Honolulu and explore the lush rainforests of Kauai.

Relax and Rejuvenate

4

Enjoy multiple carefree days at sea to take advantage of all your ship has to offer. Bask in the sun poolside and watch Movies Under the Stars®, rejuvenate with a luxurious Lotus Spa treatment or partake in a culinary demonstration followed by a galley tour. At night, there is live music, Broadway-style productions shows, singing competitions and stylish bars to share stories of the day's adventures.

More Time to Explore

5

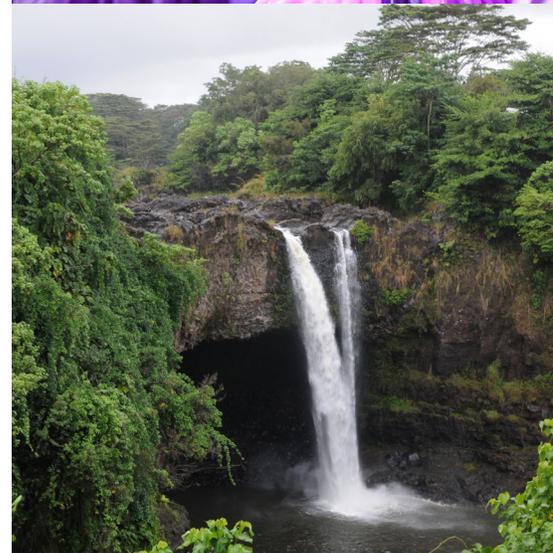

We offer a More Ashore late night departure from Honolulu on Oahu on every 15-day itinerary. Take a romantic sunset cruise complimented by soothing Hawaiian music and Waikiki views. Or enjoy a beach-side evening luau that includes an island cuisine, a Polynesian show and Samoan fire knife dancer.

Although Hawaii is an alluring destination year-round, the best season to see the islands is in the fall or the spring. Nature is unpredictable, and even with the recent volcanic activity, the majority of the Hawaiian Islands have not been affected and are safe to explore.
